It wasn't easy. There seems to be no English equivalent that you can get your hands on. I got no hits on EAST for the patent number 0280135.did., so I went to FPAS and did PN='0280135", got 3 hits, looked at them, (they were all versions of the same patent at different stages), printed out the title page, went back to EAST, searched the name of the first inventor, and looked through the hits till I got the same EP on Derwent. Here's what I got.
I suppose you could look at the "Tools of the Trade" site on WEST, but I have a hard time following their instructions for patent number searching.

ABSTRACTED-PUB-NO: EP 280135A

BASIC-ABSTRACT:

The use of protein C-inhibitor (I) as a pharmaceutical is new. Also new is labelled (I) itself. (I) forms inactive complexes with plasminogen activators, which are involved in the growth and metastasis of tumours. In the presence of a sulphated saccharide (A), the reaction between (I) and activators is greatly accelerated, and preferential reaction with urokinase occurs.

USE - (I) is useful for treatment and invitro and in vivo diagnosis of angiogenic diseases (e.g. diabetic retinopathy, neovascular glaucoma, rheumatic arthritis or psoriasis) and particularly tumours.

ABSTRACTED-PUB-NO: EP 280135B

EQUIVALENT-ABSTRACTS:

Protein C inhibitor for use as medicament.
